Model 22 & V22
HOT & COLD
Freezeless Wall Faucet

**INSTALLATION INSTRUCTIONS:**

1. Before installation, flush supply line to remove any debris.

2. Drill (2) 1-1/8" diameter holes through the wall in the desired location and insert the faucet from the outside. **FIGURE 1**
   a. Drill (2) holes for the horizontal mounted Model 22 water tubes on 5" centers.
   b. Drill (2) holes for the vertical mounted Model V22 water tubes on 3 ¼" centers.

3. Install faucet with nozzle pointing down. **FIGURE 1**

4. The water tubes must have a slight downward pitch for proper drainage. *Proper drain angle is built in to the faucet head if mounted on a vertical surface.* **FIGURE 2**

5. Secure faucet to the wall using appropriate fasteners installed through the holes in the flange. **FIGURE 1**

6. For a solder connection inlet, open faucet to full open position before soldering. Excessive heat can damage valve seat rubber or stainless steel seat and factory solder joint.

**NOTE:** The packing nut, located behind the handle, has been factory adjusted. If leakage should occur after installation or use, the packing nut can be tightened to stop the leak. **FIGURE 2**
